

## CONCLUSION

The tuition management system is a database mini project of more efficient, fast, reliable and user friendly. Over and above the proposed system doesn't have any possibilities of data loss during process. It serves as a helpful approach for the tuition administration. It reduces the time taken by the user to refine the items details from the database. It will be found to be as bug free as per the testing standards that is implemented. Thus, it serves as a helpful approach for the users.
